EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science and Engineering; CGPA: 9.02/10.0

Sehore, MP

Sep 2022 - May 2026

TECHNICAL SKILLS

- **Programming Languages:** C/C++, JavaScript, SQL
- **AWS & Cloud:** EC2, S3, Lambda, DynamoDB, RDS, and more
- **Web Development:** Node.js, Express.js, RESTful APIs
- **Tools & Technologies:** Docker, Postman, Git
- **Concepts:** Data Structures, Algorithms, Object-Oriented Programming, Operating System

CERTIFICATIONS

- **AWS Certified Solutions Architect - Associate** (AWS)
- **AWS Certified Cloud Practitioner** (AWS)
- **Cloud Computing** (NPTEL)

PROJECTS

Arogyam | *React.js, Node.js, Express, PostgreSQL, Python* | [GitHub](#)

- Built a personalized healthcare platform with an AI-powered chatbot, improving user access to healthcare solutions.
- Integrated Google Fit API to track and analyze users' daily activities, providing actionable health insights and boosting user engagement.
- Implemented features like home remedies and therapy recommendations, enhancing platform usability and increasing user retention.

OneClickAway | *React.js, Node.js, Express, MongoDB* | [GitHub](#)

- Developed a secure and scalable digital wallet with user authentication, incorporating email verification with OTP, resend functionality, and a forgot password feature, improving login security.
- PayPal API for real-time transactions, enabling users to send, request, and manage money effortlessly, reducing transaction processing time.
- Designed an interactive graphical dashboard to track transaction history, enhancing financial transparency and user engagement.

Swaasthya | *Golang, React.js, PostgreSQL, Redis* | [GitHub](#)

- Developed a scalable healthcare management platform to optimize patient flow, bed availability, and medical inventory, improving hospital efficiency.
- Implemented real-time tracking for bed management and emergency preparedness, reducing response time to critical situations.
- Integrated 2-factor authentication (OTP-based) and multilingual support, enhancing security and accessibility for diverse hospital environments.

EXPERIENCE

Fullstack Web Intern

Dec 2024 - Jan 2025

EduNet Foundation

Remote

- Forged a secure digital wallet from the ground up employing the MERN stack, implementing rigorous authentication protocols and personally writing 3000+ lines of efficient code within a one month timeline.
- Integrated PayPal API for seamless payment processing, enabling deposits, withdrawals, and transactions.
- Build key financial features, including transaction history, money requests, and peer-to-peer transfers.

ACHIEVEMENTS

- Collaborated with a team of six, each dedicating 10 hours per week for 4 weeks, to build an OPD queuing model that secured a spot in the top 40 at the Smart India Hackathon 2024.
